STORES ACCEPTING SCRIP GIVE CREDIT—NOT CHANGE

Edmonton, August 6.—Retail stores accepting provincial stamped scrip at face value will not refund change in cash, but in credit slips of their own making, it was learned here.

Fifteen business places declined scrip today. When a protest was made by the purchaser, the manager of the store stated that all retail stores in the province accepting scrip will follow a similar policy. Another store demanded cash or return of the goods purchased when scrip was tendered.

MRS. EDDY LAID TO REST AT CRESTON

CRESTON, B.C., Aug. 3.—Burial took place Thursday evening of Mrs. Martha Ellen Eddy, widow of the late James H. Eddy, within four months of the sudden passing of the latter in his orchard on March 13.

The Eddys had been resident here since 1931, when they acquired their extensive fruit ranch, coming here from Burmis, where they had farmed since 1910 on the homestead the late Mr. Eddy had located at the turn of the century.

The deceased lady was a native of Pembroke, Ontario, and was married in 1910 at Blairmore. Surviving are three sons, James at Burmis, and Homer and Ralph at Creston. Interment was in Creston cemetery. Those here for the funeral were Mr. and Mrs. James Eddy, Mrs. L. V. Blanchard and Mrs. Schmidt, all of Burmis, and J. W. Eddy, of Lundbreck; Mr. and Mrs. I. Hutton, of Bellevue. At the church service Mr. Hutton very feelingly sang "What a Friend We Have in Jesus."

MANNING SAYS NONE ARE FORCED TO SIGN

Declaring that much mis-statement and mis-representation had taken place regarding the Social Credit registration forms and the material contained therein, Hon. Ernest C. Manning, provincial secretary and minister of trade and industry, in speaking at the Edmonton Prophetic Bible conference on Sunday evening, flatly denied that an Alberta resident has to be a Social Credit before becoming eligible for the basic dividend, and also denied that retailers are covenanted to deal in Prosperity certificates.

Mr. and Mrs. W. Dutton and family have moved into their newly acquired residence at the corner of State Street and Eighth Avenue.

Mr. Sinclair, of Cleveland, Ohio, joined his sister, Mrs. Gardiner, at Bowen Island, B.C., and returned with her to Hillcrest last week. Mrs. Gardiner and family spent a month at the Island.

ATTENTION!

PROVINCIAL REGISTRATION in all Pass Towns will take place Wednesday, Thursday and Friday, August 12th, 13th and 14th.

Notices will be posted in each town where registration will take place.

CAN MR. ABERHART BE SERIOUS?

Before and since the general provincial election last year, we have repeatedly heard Social Crediters make the statement that their government "was at least an honest one." Honestly, we think, demands that one be straightforward, frank and fair in statements to the public, by ministers and private members of the government. It is not sufficient to refrain from pilfering, to be absolutely honest.

Consider the statement often made by Premier Aberhart, relative to "lending" Albertans money, through the Prosperity Certificates. At Vermilion only last Tuesday, Mr. Aberhart told his audience of some 2,000 persons that: "We lend these 'dollars' to you and we do not ask you to pay them back or pay us any interest on them. Newspapers say that we are asking you to pay 52 per cent interest on them but that is not so. All that we ask is that you pay one cent a week for every dollar you receive."

Appealing to reason, we ask: Can Mr. Aberhart claim, in all sincerity, that his statement is an honest one? Consider these facts:

The government issues a \$1 certificate. For what? The "prosperity bond" comes to you in payment for goods or services. The road worker, for instance, delivers one dollar's worth of labor and receives a certificate in exchange. So far, the exchange is presumed to be on an equal basis. But, what happens after this? The sum of \$1.04, in stamps bought with "good money" of the realm, must be paid to get one dollar back at the end of two years. If the road worker feels that his labor in the first place was worth \$1, and 1.04 in stamps are added, is not the ultimate cost of that piece of scrip 2.04 to be exact?

Assume that, in two years, the government redeems the dollar scrip, and pays the holder one dollar in legal tender. The certificate, when first issued, cost someone a dollar in goods or services. Add to this dollar another \$1.04 for the one-cent-per-week stamp, and the government's total realization for the one-dollar "loan" amounts to 2.04.

Is it honest, or honorable, to call such a transaction an interest-free or tax-free loan?

It is time for government sponsors of such drive to show greater respect for the intelligence of the people.—Hanna Herald.

Mrs. J. L. McIntyre, former resident of Fernie, where for many years her husband conducted a barber shop, and now of California, is a holiday guest of Mrs. Guy R. Johnson here.

E. O. Duke, M.L.A., for Rocky Mountain, has announced the list of Prosperity Certificate stamp vendors in his constituency. The list follows: Lake Louise, W. J. Wilson; Banff, J. D. Anderson; Canmore, J. L. Bloxham; Exshaw, Arthur Court; Seebe, George Baptie; Frank, Miss Alma Pozzi; Bellevue, Fred Tanner; Hillcrest, Glynn Rees; Blairmore, Bert Senialer; Coleman, A. E. Knowles; Burmis, H. B. Cameron; Chapel Rock, Elsie Pisony; Todd Creek and Maycroft, Joe Kubasek (Todd Creek post office).

ON GRAIN OF WHEAT

A microphotograph of a single grain of Herman Trelle's world champion wheat appeared in a recent issue of the Grande Prairie Herald, showing twelve lines of writing on part of one side of the grain, which measures, natural size, five thirty-seconds of an inch by one eighth of an inch thick. The inscription consists of the Lord's Prayer, and a record of the circumstances under which it was written, by A. Blystone, of Ardara, Pennsylvania, at the Edmonton Fair of 1935. The writing is so small that the prayer may be repeated ten times on the kernel. It is estimated that 3000 characters of the size of the Blystone writing may be inscribed on the single kernel. The inscribed kernel, placed under a magnifying glass, is part of the exhibit of prize-winning grain assembled near Lumberman's Arch by Trelle as Pearce River's contribution to Vancouver's Golden Jubilee.

BANKS REFUSE HANDLE SCRIP

Edmonton, August 6.—Clearing "stamped scrip" or prosperity certificates from his record after he has accepted it in payment of goods is the merchant's own responsibility and will not be handled by banks in the manner that cash and cheque transactions are cleared.

This was indicated today when banks reiterated their intention to "have nothing to do with scrip."

"It was never intended that we take it and the government doesn't want us to have anything to do with it anyway," said one bank manager. "None of the banks will handle it. It's up to the merchant to do it his own way after he gets started."

The visit of President Roosevelt to this country will serve as a reminder to the world of the century-long friendship that has prevailed between Canada and the United States, and that two nations can live side by side along an undefended boundary, settling all differences that may arise by peaceful arbitration.—Calgary Herald.

WORLD HAPPENINGS BRIEFLY TOLD

A delegate to the conference of the Royal Institute of British Architects prophesied that one day 15 liners the size of the Queen Mary might be in dock at Southampton.

T. H. Cunliffe, 65, assistant financial editor of the Montreal Gazette since 1919 and advertising manager for 21 years prior to the Great War, died in Montreal recently.

A confectionery firm in Sheffield, England, was fined \$8 for working an 18-year-old girl 7½ hours a week for a wage of \$3. She was not allowed proper intervals for meals.

Fred R. Goodwin, who had only five hours' "solo" experience when he started, arrived at Croydon, England, after flying to India and back. His wife accompanied him.

Three women magistrates were on the bench at Eastbourne, England, and heard a number of motoring cases before they were joined by a male colleague.

A 7,000-mile three-minute telephone call—between South Africa and Sweden—was made recently. It was believed the first commercial phone conversation between the two countries.

Drouth has taken heavy toll of wild life in Alberta, says J. Selby Walker, founder of Calgary's bird sanctuary. Thousands of young ducks have died as small lakes and sloughs dried up, he said.

Jack pine growing over thousands of acres of Manitoba forest lands is threatened with destruction by an invasion of spruce bud worms which are stripping the trees of foliage, Col. H. J. Stevenson, forestry branch director, states.

The largest private nursing home in the world is to be built in Johannesburg, South Africa. It will cover about one-quarter of an acre and accommodate 250 patients, 30 more than the next biggest home, in New York.

First Visit To Britain

Maharajah Of Mysore Making Unofficial Trip To London

The Maharajah of Mysore, whose fortune is estimated at \$500,000,000 (\$400,000,000) and who, neither smokes, drinks nor eats meat, is visiting London.

A room in the Indian prince's hotel was prepared as a temple for the worship of the Maharajah's gods, Chamundeswari, A small golden figure of the goddess had been placed in the room, and priests accompanying the Maharajah will perform daily rites.

This is the Maharajah's first visit to Great Britain, and indeed, his first departure from his own kingdom since his accession at the age of 11 in 1895.

His visit is unofficial, but he is almost certainly will be received by the King who visited him in 1922 as Prince of Wales. At that time the Maharajah beat the Prince at squash.

The Maharajah was greeted at the station by representatives of the government and of the India office. He was accompanied by a retinue of 80. After a short trip to the continent the party will return to India in September.

Should Hold Seed Wheat

Alberta Farmers Warned Against Excess Marketing Across The Border

Alberta farmers were warned by Hon. W. N. Chant, minister of agriculture, against the excess marketing of seed wheat across the international border despite the lure of premium prices there.

He also advised farmers in sections of the province where there might be a feed shortage to conserve their supplies as much as possible.

"It has come to the notice of this department that wheat is being marketed by truck across the border where the premium has reached a substantial amount," said Mr. Chant.

"It would be wise for farmers in the dry area to retain sufficient grain for seed as the policy for the coming season will not permit the distribution of relief seed grain in cases where farmers have threshed grain that is suitable for seed," he added.

New Ceramic Process

One Of The Few Advances Made In This Art In 3,000 Years

A new type of porcelain, its surface done by "nut frost," one of the few advances in 3,000 years of the ceramics art, was announced at the color conference at Massachusetts Institute of Technology.

The "nut frost" is real. It is metallic, formed when metals freeze at temperatures around 2,000 degrees Fahrenheit. The metallic frost has all the patterns of frost on the window pane, and can have all the colors of the rainbow.

The metallic frost is lustrous, its surface smooth. Unlike the frost on winter windows, the metallic frost can grow crystals of any size. It resembles pictures of flowers painted in metal.

The new ceramic was developed at the Massachusetts Institute of Technology, in the laboratory of Professor F. H. Norton, who described it to the conference. It grew out of new methods of controlling precisely one of the four standard processes of making ceramic colors.

This old process produces color by formation of crystals just underneath the surface glass. The substances which make the crystals, Professor Norton explained, may not in themselves possess any color. The shape of the crystals and the materials forming them, combine to absorb part of the light, leaving the rest to be reflected as brilliant color.

South Africa Takes Census

Used Old Method Of Cutting Notches On Sticks

The old untutored method of tallying by means of cutting notches on sticks was one of the unusual features in the general census of South Africa, held recently.

Heads of families in Zululand were instructed to conglomerate at the nearest dipping tank (these tanks are used for the eradication of ticks in cattle) for the purpose of counting all those related on them.

They brought to the enumerators sticks, on one side of which were carved notches corresponding to the number of males and on the other to the number of females in the family.

This method of counting has been in use for years with raw natives who desire to keep a check on the number of days they work for a white employer.

More than 8,000 enumerators were engaged for the census, which is the first taken for 10 years, and although the motor car was largely used for transport in the outlying districts, the horse, donkey and even the old Cape cart were found necessary in some parts where roads do not exist.

Had Narrow Escape

Aviator Struck High Tension Wires

Lost in the clouds of a violent storm a British amateur pilot, Mr. Phil Avery, when taking an aeroplane for delivery at Basle, Switzerland, struck and severed the high-tension wires over Belfort, Fortran, on the French frontier. The wires were carrying 70,000 volts. Mr. Avery miraculously escaped uninjured and safely landed the crippled aeroplane.

One Thing Lacking

Not for the first time the Englishman was belittling Scotland and everything to do with it. As he drained his second glass of whiskey he turned to his companion.

"Why," he said, "your country has never produced a really great man. You say Walter Scott? Puff! If I had a mind to do it, I could write as good stuff as ever Scott did."

"Ay, yes, right there," replied the patient Scot. "All that ye want is the mind."

Old Sheet Copper Found

A small cylinder of sheet copper believed to have been left by Captain James Smith when he took possession of the Queen Charlotte islands for Great Britain 150 years ago, has been uncovered on one of the islands. W. M. Halliday, authority on the north midcoast region of the Queen Charlotte islands, B. A. McKelvie, Victoria newspaper editor, reported the find on their return to Victoria with the cylinder. 2182

For some months, unknown to the thousands passing along the Thames Embankment, workmen have been busy behind a wooden screen under the Water Gate Arch, erecting a memorial to the late King George V. The monument, designed by Sir Edwin Cooper, was commissioned by the Port of London Authority. It is to commemorate the name "King's Reach" which was given to the stretch of the Thames between London and Westminster Bridges, on the occasion of King George's Silver Jubilee. Lady Ritchie unveiled the memorial, and we see her above with Lord Ritchie standing on the deck of a launch after the unveiling ceremony.

Long Arctic Flight

Soviet Pilots Cover 5,588 Miles Without A Stop

A long Arctic flight by Soviet pilots was hailed in the official press as an accomplishment which "will confuse our enemies."

Moscow newspapers described the plane trip of Pilots Chelakoff and Sakhoff as one of the most difficult ever made.

(The flyers, accompanied by Navigator Beliakoff, spent 56 hours and 20 minutes in the air and landed near Nicolaevsk, Siberia, after covering 5,588 miles without a stop.)

(Their plane, it was disclosed by the commissariat for heavy industry, which sponsored the trial, was only brought to earth when they were threatened by high winds and a gasoline shortage.)

On recommendation of head Soviet officials, the three men participating in the flight are to be awarded the title of "heroes."

In recognition of their accomplishment the flyers also will receive cash grants from the government.

Glider Touring Japan

To Arouse Interest In That Type Of Aviation

To arouse interest in glider aviation, a German glider, manned by a well-known Osaka pilot, is touring Japan. It is being towed by an airplane and is covering 2,500 miles in its flight, which touches all large and many small cities. The glider is practically identical with the one used by Wolf Hirth, the German master pilot who coached Japanese glider men last year. It is the best machine of the kind in the country except that owned by army air forces.

Perpetually Honored

Saskatchewan Lakes May Carry Names Of Victoria Cross Winners

Four Saskatchewan men, winners of the Victoria Cross during the world war, are going to be honored perpetually by having names of many northern lakes named after them, according to Hon. W. F. Kerr, minister of natural resources.

Mr. Kerr has made recommendation to the geographic board of Canada that the following lakes be named:

102—Zengle Lake—After R. L. Zengle who won the Victoria Cross while serving with the 5th Battalion—A Saskatchewan unit.

108—Cairns Lake—After the late Hugh Cairns, formerly of Saskatoon, who won the Victoria Cross while serving with the 46th Battalion.

109—Mullins Lake—After Henry Mullins of Mooseomin, Saskatchewan, who won the Victoria Cross while serving with the Princess Pats.

114—Combe Lake—After the late R. G. Combe, formerly of Melville, Saskatchewan, who won the Victoria Cross while serving with the 27th Battalion.

Back From Nature

Members Of French Nudist Colony Now Wearing Clothes

Nudists at the French "Naturalist" colony on Heliopolis Island, in the Seine, about 25 miles from Paris, have returned to clothes. Only babies under three are to be allowed to go entirely unclothed. On the island are hundreds of tiny tents and small asbestos cabins, which were erected by the "back-to-nature" colony. The nudists now wear more than is usually seen on bathers at fashionable seaside resorts.

Kittens at Play in Dainty Crochet

When you take Baby for his airing, bundle him in with this adorable carriage set—pillow and cover! You'll find it easiest of the easy to do, in just plain crochet, and most appealing in white with blue or pink, or in two shades of one color. It's glorious fun to watch those playful kittens appear one by one, as the simple stitches mount up. Use Germanstown wool, for it's both lightweight and warm. In pattern 5672 you will find complete instructions and charts for making the set shown; an illustration of it and of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (not preferred) to Household Arts Dept., Winnipeg Newspaper Unit, 175 McDermott Ave. E., Winnipeg.

SUNDAY SCHOOL LESSON

AUGUST 9

SAUL CONVERTED AND COMMISSIONED

Golden text: I was not disobedient unto the heavenly vision. Acts 26:19; Lesson: Acts 9:1-31; 22:3-21; Galatians 1:11-17; I Timothy 1:12-17; Devotional reading: Isaiah 61:1-8.

Explanations And Comments

The Persecutor Becomes a Convert. Acts 9:1-19. But, while Philip and other disciples "scattered abroad" were busy in extending the kingdom, Paul with equal zeal was persecuting the Christians at Jerusalem. He was "breathing threatening and slaughter against the Christians," we are told; he lived, as it were, in an atmosphere of hatred, fury and destruction. "The words 'breathing out' are expressive of a deep, agitating emotion, as we then breathe more rapidly and even violently in order to supply the oxygen needed to supply the exhausted vitality consumed by the emotion. It is thus expressive of violent anger" (Albert Barnes).

As Paul was approaching Damascus there suddenly arose round about him a dazzling light, brighter than the Syrian sun. He fell to the earth and heard a voice calling him: "Saul, Saul, why persecutest thou me?" "Who art thou, Lord?" he questioned in return and the solemn answer came, "I am Jesus whom thou persecutest; but rise and enter the city, and it shall be told thee what thou must do."

Before Paul found the life some brave warm-hearted believers must be found who would go to him, sympathize with him, and lead him into the fellowship. It took courage for a Christian to face the man who had come to put the Christians to death, but this was Ananias, a devout man according to the law, well reported by all the Jews that dwelt at Damascus (Acts 22:12).

Perhaps Ananias was the leader of the little Christian Church at Damascus. He is known only for his service to the great apostle Paul when Paul was in need of a brother. Ananias led Paul to a house in the street of Damascus called Straight, and when he saw and talked with him, he was glad that his features were needed. Tenderly he put his hands upon Paul and called him with gentle words, "Brother Saul," saying, "The Lord hath sent me that thou mayest receive thy sight, and be filled with the Holy Spirit. And now open thine eyes. He baptized him. He brothered him."

Then he came to Paul at a more critical time. A hand held out, and a brotherly greeting—who can tell the fellow who led him to the movement that was to carry the gospel to the regions beyond?

Self-Sufficiency Program

Russia Now Intends To Buy Less And Sell More

Russia henceforth is going to buy less and borrow less, sell more and save more—towards the goal of self-sufficiency.

Furthermore, Foreign Trade Commissar Archibald Rozenzlotz told the conference for foreign trade that it was necessary to send so many Soviet salesmen abroad—the buyers are flocking to Moscow.

The reason for the self-sufficiency program, he asserted, is clear: "In the present period of increasing military dangers, the necessity to prepare for defence and the significance of increasing gold reserves is apparent."

"Reduction of imports will be continued and intensified" during the third and current five-year plan by which the USSR aims at future self-sufficiency, Rozenzlotz said. He added, "We hope to get along almost without imports."

High Salaries

Many Big Industrialists In United States Receive Huge Pay

The Toronto Star cites five big industrial men in the United States with salaries of \$200,000 per year and over, and nineteen others with salaries of over \$100,000 per year. In all cases, the high pay is the reward for assembling thousands and hundreds of men into an organization of production, competitive with the world, and it is a highly debatable point whether the salaries of such size are justified when compared with standard wages in industries which provide them. Comparatively movie and baseball stars are paid more and contribute no effort for the employment of large numbers of other people with dependent families. The system of high reward for creative effort and exceptional skill may be all wrong, but where is the better system to replace it?—St. Catharines Standard.

Australian Aborigines

Aborigines are becoming as scarce in Australia as Indians in the United States, according to the latest census, recently completed at Canberra. These show that there still remain only 60,000 full-blooded aborigines in the country, of whom 24,000 were either in employment or were living in supervised camps. The remaining 36,000 are nomadic.

More than 7,000,000 members are enrolled in athletic clubs in Ger-

Some Strange Foods

Unusual Things Found By Those Who Search For Them

Snails are not exclusively a French dish. They have been eaten for generations in Swindon, Wiltshire, where, even now, if you are lucky, you may find a dish on the public-house bar counter.

Stranger menus can be found by those who search for them between Land's End and John o' Groats. In Radnorshire, the cat rabbits and fishes' eyes, while epicures who can afford trout's cheeks find it takes fifty fish to fill a small saucer with this delicacy.

Brown Geordy, a North of England sweetmeat, is made from bran, white Cornish pasties and pickled pie complete with the neighboring Devonshire squab pie, in which apples, mutton, onions and pastry are the ingredients.

Candied rose leaves, nettles in salad and roan tree berries, which look so poisonous but make wonderful jelly, and cookies and cream vie with thunder and lightning for first place of favor in many homes. The latter is made from treacle and Devonshire cream.

Jellied eels, spotted dog, and toad in the hole are everyday dishes everywhere, but in Wales and Ireland they eat seaweed and sea-slug soup.

The names "Singin' Himey" and "Pat Rascal" are just aliases for thick griddle cakes.

Ice-cream dipped in hot chocolate is an American invention which is made a fortune for its sale in St. Louis, the royal del which is so rare, is imitated in many places. Just boned turkey broiled in wine, vinegar and coarse salt.

In remote parts of Scotland and Ireland they eat self-gulls and rid of the baby trash by leaving them overnight stuffed with onions. When the onions are removed the fishy flavor has gone.

Despite all these strange dishes, we still have a long way to go to compete with lion chogy as once eaten by the King and the Duke of Gloucester on safari.

And one big game gourmet once sat down to a banquet of antelope custards, bear's eggs, scotch egg salad, curried locusts and parrot pie.

Odd Uses For Electricity

One Of Strangest Is Lighting Of Duck Farms

The farmer and the electrician have found many uses for electricity in lightning labor. Current is now used to heat, cook, furnish light and power, destroy insects, cut grain and even to keep vegetable crops from freezing. One of the strangest uses is the illumination of duck farms. The duck farmer is afraid of the dark and sometimes stampede at night. Under the bright lights they lose their timidity and remain content. The Ohio Agricultural Experiment Station found that cooked soybeans were an extra good supplemental food for hogs. To cook these over an open fire was a chore. Labor costs were high. Electricity cooks them at 10 cents per hundredweight in an electric cooker.

In egg storage, temperature is important. If temperatures are above 55 degrees or below 30, the whites of eggs become weak and watery and the yolks are visible in candling. With electric coolers controlled by thermostats, an ideal temperature of 50 degrees can be maintained.

Underground 'Phone Cable

Elimination Of Wires Foreseen By Research Expert

The birds that roost on telephone wires will have to find somewhere else to sit in the near future. Science, according to Dr. Oliver E. Buckley of New York, is the subject of research for the Bell Telephone Laboratories, is about to eliminate the wires.

In their place, he told telephone company employees in Denver, Col., recently, will be underground pipes, capable of transmitting hundreds of messages simultaneously.

The newest development in telephone research is called the coaxial cable. Dr. Buckley said.

"I wonder what causes the flight of time?"

"It is probably urged on by the spur of the moment."

The public cannot help but be a little disappointed in the failure of the local business houses to come to any definite understanding regarding the acceptance of Prosperity Certificates at the meeting on Tuesday night; but it would have been a difficult matter to have come to a definite understanding before more is known regarding the workings of the scheme.

Had the business houses agreed to accept these certificates, then the public of this district would also accept them on their assurance, and it may be a matter of a short time when cash registers will begin to fill with certificates which cannot be passed on. We have reliable assurance that the government contemplates steps for the redemption of the certificates every month, but we have no assurance that such arrangements may not be as unworkable as the recall bill, nor that redemption may not be discontinued as soon as the circulation of the certificates is established. It is only natural that the business houses will want to know just how they can be redeemed and by whom before committing themselves.

Nor can we see that the business houses would have been wise to reject the scheme entirely. With the co-operation of the government, the scheme may be workable, and may be of benefit to all concerned. Also rejection of the scheme would have placed a small portion of the population in an uncomfortable light with the public, as these few men would have been accused of lack of co-operation, and possibly for the failure of social credit. Without more information, the business houses can hardly be expected to announce that they will accept the bonds, and without more information they can hardly be expected to reject them.

When the scheme was first proposed, it was understood that the certificates could not be redeemed before the two-year period, by which time they would have retired themselves after holders had placed 104 cent of their face value upon them in stamps. Under this scheme they promised to be worth nothing. Then redemption through the wholesalers was promised, but when the manufacturers and wholesalers refused to handle them, they still promised to be worth nothing. Now, through the proposals of the government to redeem them every month they promise to be worth something, and if these arrangements for redemption are practical, the scrip can be accepted, although it may not be as profitable a scheme for the government as they had originally hoped.

GRASSHOPPERS USEFUL!

At last the greatly-cursed grasshopper has received a word of praise, and this came from George Batho, Manitoba roads commission chairman, who recently stated that the otherwise pests had accomplished a fifteen million dollar job in the eradication of weeds, covering a solid block of one hundred and fifty townships in an area of about 6,500 square miles.

The grasshoppers are, apparently very fond of sow thistles, and in cleaning out the country of this noxious weed, Mr. Batho says that the humble grasshopper has partially repaid for its damage of thirty million dollars' worth of crops for which they had been responsible in the past five years.

"NOBODY READS THE PAPER"

"Nobody reads the paper, so why advertise?" say some merchants. Yet advertising experts of national concerns, men who demand and get vested, yearly give a big share of their advertising appropriation to weekly papers.

"Nobody reads the paper," yet if the editor gets the mumps, the linotype breaks down or anything else happens to delay the paper, the post office and editor are swamped with calls from indignant subscribers.

"Nobody reads the paper," but let the editor misspell one name in an obscure item buried at the bottom of an inside page and 20 readers will "kid" him about it before the paper has been out two hours.

"Nobody reads the paper." Then why do the local publicity hounds beseege the editor for favorable notices? And why are politicians so eager for the support of the paper?

"Nobody reads the paper." Yet the delinquent subscriber squawks to high heaven when his subscription is stopped.

"Nobody reads the paper." Then why in the name of common sense is a man so anxious to keep his misdeeds from being published?—EX.

"STRONG WORDS"

"When you hear a man sneering at the local paper," says The Brooks Bulletin, "because it is not big, cheap and newsy as the city dailies, you can bet he does not squander any of his wealth in assisting to make it better, and that generally the paper has done more for him than he has done for it. The man who cannot see the benefits arising from a local newspaper is about as much value to a town as a delinquent tax list."

Received an Answer!

"Good gracious," shouted the schoolmaster. "I ask you the simple question, 'what is a fortification?' and get no answer." The scholars stared, but no one answered. The master tried again. Pointing to the boy at the bottom of the class, he demanded: "Tell me, what is a fortification?"

"Two twentyentions, sir," came the answer.

He was a good barber, but his schooling had been neglected. On the wall of his shop was a card bearing the words:

When young Witting, commercial traveller, drifted in, he spotted the mis-spelt card, and: "Short at the back and round the ears, please," he said, seating himself in the chair, "and you can give me a verse and chorus of 'When I Grow Too Old to Dream'?"—EX.

The Church Militant

A bishop was invited to dinner. During the meal he was astonished to hear the little daughter of the house state that a person must be brave these days to go to church.

"Why do you say that?" said the bishop.

"Oh," said the little child, "I heard papa telling mamma that last Sunday there was a big gun in the pulpit; the canon was in the reading desk; the choir murdered the anthem; and the organist drowned the choir!"

Blairmore were minus several of the best players in the opener of the double-header, but at that managed to hold a lead on the Cardstonians till near the ninth. The late-evening exhibition, was well attended, and a very interesting game.

Stamped scrip in Alberta, on the Aberhart plan is not feasible, according to outstanding authorities, and still, if a man does not believe in the Alberta scrip plan, he is a slacker. And again lots of people do not believe in Ultimate Consumer's Tax, or should we go back a year and say "levy." And because people do not believe in a lot of things, which are to be found in Alberta's economic mulligan, they are supposed to be slackers. What rot!—Drumheller Review.

Alberta has two distinct fishing industries, the fish in Alberta's lakes and the human fish, who bite at anything which has food, clothing and shelter wrapped up in the verbal bombs, which are daily hurled at our dear people. Alberta may have a shortage of wheat, a lack of rain, a poor coal year, but it always has a bountiful crop of human fish. Barnum has been quoted as saying there was a sucker born every minute, but had Barnum lived in Alberta he would

Appointment of three new public school inspectors to fill vacancies caused by superannuation of the provincial inspector staff has been announced. The three new inspectors are J. C. Jonason, B.A., of Camrose; Munroe Macleod, M.A., of Camrose; and C. M. Lavery, B.A., of Lacombe. All three are graduates of the University of Alberta. The retiring inspectors are W. J. The following resolution was passed at a U.F.A. picnic rally at Willow Creek, near Macleod: To the premier: Moved by J. E. Peterson, Claresholm; seconded by Mrs. Wakefield, of Stavelly. Whereas new taxes have greatly increased the cost of living in this province; whereas we were repeatedly assured that there would be a decrease in taxation; therefore be it resolved that we censure the present government for its action in imposing new taxes on the already overburdened people of this province. And another one ran this way: "Whereas, the patronage system as it operates in Alberta is detrimental to good government; whereas, it involves the dismissal of some of our best trained men; therefore, be it resolved that all government appointments and dismissals be made by a non-political commission."

Speaking at the Prophetic Bible Institute on Sunday last, Hon. Mr. Manning is reported to have said: "If we

fail the hope of freedom from economic slavery will die within the hearts of thousands of people. If we win, we'll kindle a fire of new hope." The citizens, he added, "will decide which way the die will be cast." Mr. Manning is in error when he says that the citizens will decide whether or not Social Credit will be a success. Social Credit involves a complete reversal of the present financial system, and the people have already decided that that is what they want, they decided about last August: It was that decision that placed Mr. Manning in the office of Provincial Secretary and Mr. Aberhart in the Premier's office. They, together with the rest of the members of the Aberhart government, "will decide which way the die will be cast."—Edson-Jasper Signal.

IT'S ALL A MATTER OF HOW MUCH LIGHT

For nearby subjects when the light is not very bright as in the picture above, use a wide lens opening.

But for distant scenes, like this to the left, use a small lens opening.

BECAUSE modern cameras and modern film make it possible for us to achieve happy results with very little knowledge of how our cameras function, many of us do not bother to find out, but we will more often get better pictures if we know enough about our cameras to understand what they're up to.

Any camera is simply a light-tight box or chamber, with a film at one end and a bit of optical glass, called a lens, at the other. Add to that a contrivance for admitting light under control into the box, through the lens to the film, and you have the essentials of a camera.

The size of the lens and the extent to which it is opened are important. When the lens opening is large, a lot of light is let into the camera to record the picture on the film. That's all very well, but lenses do not do their best "wide open" in giving sharp images of all objects both near and far. When you want sharp, clean-cut detail from foreground to distance, as in a good landscape picture, you have to use a smaller lens opening.

When you are interested only in picturing an individual or a compact group, as in the dog picture above, you can safely use a relatively larger opening if you focus carefully. Indistinct detail beyond doesn't matter so much, in fact often helps to accentuate the principal subject.

In virtually all cameras there is some means of changing the size of the lens opening. In most box cameras you pull out a little slide at the top of the camera. In most folding cameras there is another type of adjustment called a diaphragm, with which a greater variety of openings can be obtained.

In most diaphragm types, the major settings are shown by the numbers

which have a bearing in terms of the ratio between the diameter of the lens opening and the distance from the lens to the film. In designating these settings, the letter *f* is used. When you see that a picture was made with the lens at *f*11, it means that the opening of the lens was 1/11th of the lens-to-film distance. It happens that *f*11 is a good average opening, *f*16 or *f*22, for example, cut down the amount of light entering the lens. Consequently, given the same light conditions, longer exposures are required.

That brings us to another gadget which, in terms of time, also controls the amount of light that enters the lens—the shutter. For most ordinary snapshots, a shutter that opens and closes in about 1/25th second is entirely adequate. In fact, this shutter speed, coupled with an opening of *f*11, is so nearly right for average outdoor conditions that it is a kind of magic formula. Shutter speeds faster than 1/50th second are seldom needed except for pictures of rapidly moving objects, and these with a larger lens opening; otherwise, not enough light would be admitted.

Lenses, by the way, are rated according to the largest opening at which they work. You hear camera fans talking about *f*6.3 lenses, *f*4.5 lenses, and even *f*2.8 lenses. These "fast" lenses are wonderful things; they'll get pictures under the poorest kind of light and they do have that extra speed when you need it. But even so, they all work better if the subject has adequate light with the resulting opportunity to stop down (use a smaller opening) for the sake of sharper detail.

JOHN VAN GUILDER.

RULES FOR LOOKING OLDER

An astute male observer offers the following rules for the woman who wants to look ten years older than she really is:

1. Don't get too much sleep—four hours a night is plenty.
2. If you are tired, use more make-up before going out.
3. Spend at least three hours a day worrying over trivial matters.
4. Don't have your eyes examined or wear glasses as long as you can see a house.
5. Keep on the go! How can you possibly enjoy yourself while reading a book or resting?
6. If you are 30 years old, you can look 40 by dressing like a girl of 20.
7. Don't bother to protect your eyes on the beach or tennis court. Toughen them up!
8. Believe your husband, implicitly when he tells you that he doesn't mind your being ten pounds overweight.
9. Wear shoes that pinch.
10. Avoid regularity of hours or meals at all costs. Be modern. Live on your nerves and they will live off you.

Making a Hobby of One Kind of Picture Subject

Many amateurs make hobbies of finding subjects with which to typify a single idea, phase of life or activity. Here are two pictures from an amusing collection picturing "Innocuous Desuetude."

WEALTHY art collectors often indulge their fancy by specializing in one kind of picture subject, such as landscapes, marine views, genre sketches or portraits, and assembling the pictures in a separate exhibit.

As an amateur photographer you do not have to be wealthy to enjoy a similar hobby. With your camera you, too, can make a specialty of one kind of subject and derive even more pleasure than does the art collector, because you have made the pictures yourself.

Choices for a one-subject photographic collection are endless. There are all sorts of appealing individual objects, types of which may be selected; there are the different activities and phases of life, the various phenomena of nature, and the characteristics of human nature, all of which may be portrayed in interesting pictures, if you will cultivate a discerning eye for them, and have your camera with you when you go places.

We know a clever amateur who chose as his subject WIND—big winds, hurricanes, cyclones, blizzards, breezes and zephyrs. He was so enthusiastic that he would hardly take his camera out if the wind were not blowing. His pictures consist of things in movement under the impact of wind, or the results thereof—trees bending under the force of a storm, pretty girls with

tresses and garments fluttering in the breeze, white caps at sea, wind-blown snow drifts, whirling chimney smoke, wind-whipped flags and bunting, and the havoc wrought by wind.

Another has specialized in faces of cows and produced a collection of cow portraits wonderful to behold. It is surprising how much amusing variety there is in the expressions of cows, especially those taken when the cow is alarmed. All who see this collection laugh.

"Innocuous Desuetude" is the subject of another collection, being "off-guard" snapshots of human beings in all sorts of attitudes of repose, and chuck-full of human interest—bench warmers in the park, tramps, dozing fishermen, waterfront loafers, and gossipers on the steps of the country store. Still another, a circus fan, specializes on circus pictures, inside of the big tent and out. No one can see his snapshot collection of side-show freaks, clowns, barkers, elephants and gaping spectators without immediately yearning for peanuts and pink lemonade.

Picture hobbies of others are fires, lightning, waterfalls, yachts, railroad locomotives, and so forth.

Pick your subject and try it. There's a world of fun and adventure in it, and a great chance to use your artistic talent in the photography.

INDEPENDENCE OR NOTHING

WITH the aim to live on in service through the span of many lifetimes, to what can a newspaper bind its policy so that it may endure in strength and grow in the respect of its readers. Movements spring up like mushrooms over night and wilt in a day. Governments have their brief years of power and pass into the limbo of forgotten things. Companies and corporations wax and wane with changing policies and changing hands.

TO none of these things can a good newspaper be fettered. It is larger than all. It must have a longer view, a broader scope, a deeper inspiration. It is not a voice for the opinions of the few but a faithful echo of the great voice of the people.

IT must be free, it must be independent, to grow with the upward-striving national mind and to interpret faithfully the wishes of its citizens. Independence—or nothing. Independence is a newspaper's very life. Preserve that freedom of the press and you keep a safeguard to your own liberty.

By all means form your own opinions, from unbiased news columns. Your right to say what you think, your right to criticize freely—all those rights cherished by a free people are upheld by the independent newspapers of Southern Alberta.

OPPOSITION IN MANITOBA HAS THIRTY SEATS

Winnipeg.—Further ballot counting in the Manitoba election brought the combined opposition strength in the legislature to 30 against a total of 21 government candidates elected. With two seats in doubt and two with deferred voting Premier John Bracken and his Liberal-Progressive followers were definitely placed as the largest group in the next legislature but well short of a working majority. Second largest group with the Conservatives with 16 members under Erick Wiens, youthful newly chosen leader.

Candidates declared elected on later count were James McLenaghan, in Kildonan-St. Andrews, and G. Renouf in Swan River. Conservatives, H. F. Lawrence in St. Boniface, C.C.F., and H. H. Wright in Emerson, Independent.

The party lineup was: Liberal-Progressives, 21; Conservatives, 16; C.C.F., five; Independents, three; Communist, one, and Social Credit, five. Liberal-Progressives were leading in one of the two remaining seats, C.C.F. in the other.

Re-election of Mr. McLenaghan in Kildonan-St. Andrews had been almost a foregone conclusion for he had piled up a substantial lead on the first count over C. E. Fillmore, Liberal-Progressive. The final count gave the Conservative member a majority of 599.

Speculation as to a possible alignment of Liberal-Progressives with one of the smaller groups was rife but the government gave no indication as to its plans.

Employment Gain

Shown To Be On Upgrade In Five Economic Areas

Ottawa.—Employment is on the upgrade in Canada, and each of the five economic areas showed a gain in the number at work on July 1 compared with June 1 and also in comparison with July 1, 1935, according to a report issued by the Dominion bureau of statistics.

Of the eight figures for which figures are available increased activity was shown in Toronto, Ottawa, Hamilton, Winnipeg and Vancouver, while Montreal, Quebec and Windsor, Ont., showed declines.

Reports from 1,744 employers show 887,955 persons at work on July 1 compared with 903,401 the preceding month. On July 1, last year, 9,233 reported 934,262 employed. The gain of 24,554 was the biggest increase between June 1 and July 1 in the preceding years.

Contrary to the usual trend at July 1, employment in manufacturing showed advancement over the previous month with most of the gain recorded in the food, lumber and pulp and paper groups. Mining, with the exception of coal, communications services, transportation and construction and maintenance also showed considerable improvement. All the increases, with the exception of that in construction, exceeded the average gains from June 1 to July 1 for the past 15 years.

At the same time seasonal declines were recorded in logging, and in the factory group recessions were shown in leather, textile and iron and steel plants.

Has Chartered Yacht

King Edward To Cruise Along Dalmatian Coast For Few Weeks

London.—King Edward has chartered the yacht Nahlin for a three or four weeks' cruise along the Dalmatian coast, it was announced at Buckingham palace.

The king will probably join the yacht in about 10 days at Dubrovnik, Yugoslavia. He will be accompanied by three or four friends.

The vessel is the property of Lady Yule, widow of Sir David Yule, former Anglo-Indian merchant. It is a twin screw schooner, originally costing \$1,500,000, and is registered from Glasgow.

The cruise will replace a projected vacation at Cannes, France, which was cancelled after the outbreak of the Spanish rebellion.

Bringing Gifts To Canada

London.—When Sir Percy Vincent, lord mayor of London, leaves here to attend the jubilee celebrations in Vancouver, he will take with him numerous gifts, including a massive silver relief of 18th century London, presented to Vancouver by the citizens of London, and a picture of the tomb in Petersham cemetery of Captain George Vancouver, after whom the Canadian city was named.

Build More Ships

Britain Plans Construction Of Two New Battleships

London.—Plans for construction of two new battleships included in the 1937 naval rearmament program were announced in the House of Commons by Sir Samuel Hoare, first lord of the admiralty.

Sir Samuel said construction would begin in January, 1937, with final details as to the cost to be negotiated later with the contractors.

"Arrangements for laying down these ships," the first lord told the commons, "are being made in full accord with the declared policy of His Majesty's government to press on with naval replacement and the new construction program with all possible speed."

The five-power Washington naval treaty with its limitations on defence, lapses at the end of this year and a tri-power accord comes into effect.

Under it wide latitude is provided the signatories—Britain, France, and the United States—with the proviso they exchange information on plans before construction is begun.

Japan is not a signatory of the new pact. Sixteen-inch guns will be used on the new warships, under tentatively announced plans, in the hope other countries will follow with the same sized pieces.

Orders for the new men-of-war were given to Vickers, Armstrong, Ltd., at Walker-on-Tyne, and the Cammell Laird Co., at Birkenhead.

Was Noted Stock Expert

Manager Of Royal Winter Fair Dies In Toronto

Toronto.—Alexander P. Westervelt, 64, for 14 years manager of the Royal Winter Fair and an outstanding Canadian live stock expert, died in hospital here after a brief illness. For the past 20 years he had lived at Clarkson, a few miles west of Toronto, where he operated a small farm as a hobby.

Mr. Westervelt collapsed at his desk while engaged in making preparations for the forthcoming winter fair.

Since its inception in 1922, he had been the guiding spirit of the Royal Winter Fair and he was responsible for the success of the livestock shows that caused the fair to grow from year to year and attract exhibits from coast to coast.

World Poultry Congress

Canadian Exhibit Of Plymouth Rocks Is Featured

Leprie's.—A feature of the exhibition attached to the sixth world poultry congress in session here in a Canadian exhibit of Plymouth Rocks of a new breed which can be easily raised in cold climates.

The Plymouth Rocks form part of a large Canadian exhibit of all types of poultry. The United States, Belgium, France, Holland and Denmark also have large exhibits.

Representatives of 42 nations are attending the congress. There was a ready market for the Plymouth Rocks at prices as high as 150 marks (\$60). Swedish and Finnish breeders were especially interested.

Bishop To Visit Canada

Says He Is Coming To Visit His Numerous Relatives Here

London.—The Bishop of London, Right Rev. Arthur Winnington-Ingram, announced that he was sailing for Canada on the liner Queen Mary on Aug. 5 to visit his 34 nieces and nephews, great-nieces and great-nephews.

Jokingly he said he expected the prime minister of Canada to erect a marble statue to the Winnington-Ingram family for doing its part in populating the Dominion.

Dr. Winnington-Ingram has been a frequent visitor to Canada. Visit War Cemeteries Arras, France.—Sir Robert Borden, wartime prime minister of Canada, accompanied by Col. Frank Higgins, son, chief administrative officer of the Imperial war graves commission, and Col. H. C. Osborne, Ottawa, secretary of the Canadian war graves commission, toured soldiers' cemeteries and memorials amid the battlefields of France and Belgium.

Canadian Freighters Rescued

Montreal.—The Canadian Leader, a freighter sold by the Canadian government to the Montreal-Australian-New Zealand line, has been rescued by that firm to the Tower Steamship Company of London, Eng. The 5,492 ton ship, laid up at present at Halifax, will be reconditioned and taken across the Atlantic in the next few weeks. 2192

King George Memorial

Sultan Of Johore Has Contributed \$25,000 To Fund

London.—A contribution to the King George V. memorial fund of \$5,000 (\$25,000) from the Sultan of Johore was announced. The contribution was sent on behalf of the sultan, his people and his government in token of their gratitude for the many great benefits received from the late king's protection during his reign of 25 years, said a message accompanying it.

The fund is now near £200,000 (\$1,000,000).

Round-Trip Flight To London

New York.—Dick Merril, the aviator, said that he and the singer Harry Richman had completed their arrangements for the first "round trip" flight from New York to London "between Aug. 15 and Aug. 20."

BALDWIN VOICES HOPE FOR PEACE OF THE WORLD

London.—Canadian veterans heard the British prime minister declare that if no better means than war can be found to settle disputes "the world deserves to perish." They heard him outline a hope for the future on the evidence of comradeship existing today between men of the Great War's opposing armies, and attribute many of the world's present troubles to the loss of young potential leaders in war.

Prime Minister Baldwin, meeting the Canadian Vimy pilgrims in Westminster Hall, 700-year-old provider of present parliaments, greeted them warmly as men who had "sprung to the side of Britain" in the great crisis of 1914-1918.

Later the pilgrims—veterans and the kin of those who died at the front—held service before the cenotaph in Whitehall, the service under Rt. Rev. Winnington Ingram, Bishop of London, beginning with "O Canada," and continuing with prayers, and the strain of "O God Our Help in Ages Past."

The deep tones of Big Ben struck noon as buglers sounded "The Last Post." The banners of the legionnaires dipped in salute, and for a moment the great throng stood in silence. Then came reveille and the service ended with "God Save the King."

At Westminster Abbey a group of veterans paid tribute to Britain's unknown soldier. There the wreath was laid by Mrs. C. S. Woods, of Winnipeg, mother of 11 sons who served in the war, five of whom did not return when "cease fire" was sounded.

Prime Minister Baldwin spoke feelingly of Lord Byng, the Englishman who commanded the Canadian corps at Vimy, and of Sir Arthur Currie, the Canadian who followed him in command. Friends in life, Byng and Currie were "in death not long divided."

He spoke of the ceremony in London in June when French and German veterans placed their colors on the cenotaph, and saw how that "when men can do that, there will be no more fighting."

SIR SAMUEL HOARE VISITS DEFENCE

1431

Sir Samuel Hoare, recently appointed First Lord of the Admiralty, paid his first official visit to the Fleet recently when he flew from Hendon and alighted on the deck of the aircraft carrier "Courageous," which was cruising off the Isle of Wight. Above we see Sir Samuel after his plane had landed on the boat.

Obtain Leave To Appeal

Privy Council Grants Petition Of The Canadian Government

London.—The judicial committee of the privy council has granted the petition of the Canadian government for leave to appeal to that body concerning the validity of several acts dealing with labor and employment passed by the Bennett government last year.

C. P. Plaxton represented the Dominion government. Ontario and British Columbia joined in petitioning for leave to appeal. Attorney-General Reebuck represented Ontario and J. E. de la Farris the Pacific coast province.

The Dominion petitions concern the validity of the act providing for the payment of a 45-hour week; the Minimum Wages Act and the Employment and Social Insurance Act. The supreme court of Canada held the first three of these partly valid and the last one unconstitutional.

May Buy Cattle

Nova Scotia May Repurchase Herds With Western Canadian Livestock

Halifax.—Hon. John A. McDonald, Nova Scotia minister of agriculture, said that the government had under consideration a plan to replenish the province's depleted herds with cattle from Western Canada's drought lands.

"Cattle have been materially reduced in this province, especially in the eastern portion from the drought of two years ago and a much smaller average crop last year, said Mr. McDonald.

"We could pay as much as the abattoirs for the cattle, and if we could get the freight rates down it might prove of some benefit to our farmers," he added.

Mr. McDonald said Nova Scotia had prospects of the largest hay and forage crop "in many years" and desired for more cattle had been expressed by many farmers.

Urges Help For Defence

Bristol, Eng.—Stanley M. Bruce, Australian high commissioner in London and former prime minister of the commonwealth, in a speech here urged that the British dominions make a larger contribution toward the defence of the Empire.

U.S. Wheat Shortage

Will Necessitate Importation From Canada Says Secretary Wallace

Washington.—A shortage of hard wheat in the United States would necessitate some importation from Canada, Secretary of Agriculture Wallace told a press conference. He declined to predict how much wheat would be brought in from Canada but called attention to predictions in trade circles of about 40,000,000 bushels.

Indications were the United States would have a wheat crop approximating the domestic demand other than the shortage of hard wheat. There would be a surplus of soft white wheat in the Pacific northwest, he said.

Possibility the country might have its smallest corn crop since 1881 was raised by Wallace as the current drought pushed the agriculture department's price index on farm products to the highest level since September, 1930.

Wallace said the corn outlook was by no means definite yet. But he said that the agriculture department mentioned the possibility of sizeable corn imports from the Argentine and elsewhere.

THE KING GREETS CANADIANS AT GARDEN PARTY

London.—King Edward has never been nearer a real undisputed mobbing than when he appeared at the Duke of Gloucester's garden party to 8,000 Canadian Vimy pilgrims at Buckingham palace.

Girls struggled to put him on the back and men thrust forward to shake hands. His bodyguard of detectives had to apply gentle but unmistakable force to make way for him. He seemed to enjoy it thoroughly and was all smiles when at length, looking not at all disconcerted, he reached the comparative seclusion of the royal enclosure.

His appearance was in the nature of a surprise, as it was the Duke of Gloucester's entertainment primarily and there was doubt as to whether His Majesty would be able to attend.

But to delighted cheers and amid a whirlwind rush of berets and hats of every feminine variety, the king was escorted, spotted, hailed and in a grey lounge suit, striding across the lawn.

Thousands of visitors wedged themselves around the royal enclosure, eager to catch even a glimpse of His Majesty and his companions, the Duke and Duchess of Gloucester and other guests.

And to complete the afternoon's enjoyment, just as the company was dispersing, His Majesty made a little speech, as happy in style and manner for such an occasion as that delivered at the ceremony at Vimy Ridge. Obviously moved by the tumult of acclamation he held up his hand for silence. In a voice carrying far and wide, he said:

"Old comrades and friends from Canada, none of us who were present at the wonderful ceremony at Vimy can ever possibly forget it. For me personally my recollections will always be vivid, because it brought me into contact again with so many Canadians. It brought back memories to me, not only of the Canadian corps during the war, but also of my four visits to the Dominion. It was a very beautiful and moving occasion, but inevitably tinged with sadness."

"Today we met under less solemn and certainly happier circumstances—although, I am sorry to say, somewhat damper circumstances."

This raised an outburst of laughter. "We don't care. We are enjoying ourselves," shouted one pilgrim as the king glanced ruefully upward at the teeming heavens.

"I don't take any responsibility for the rain," continued the king—who raised another merry shout. "I can only hope you have not got very wet, and when I know how badly the rain is needed in Canada, especially in the west ('Alberta—High River,' interrupted a pilgrim), I can say that we certainly have the rain in the wrong place."

"I want to assure you what a very great pleasure it is to welcome you at Buckingham palace and to see you before you sail for your homes in Canada. I sincerely hope you will enjoy every minute of your stay here, and carry back memories of the great pilgrimage to hearten you in the years to come."

As the king finished, there was another storm of applause. Someone started "For He's a Jolly Good Fellow," 8,000 voices taking up the refrain.

U. S. EXPORTS TO CANADA SHOW HEAVY INCREASE

Ottawa.—The United States forged ahead in June as Canada's chief supplier of goods, it was shown in a report issued by the Dominion bureau of statistics, but the United Kingdom's exports to this country also rose.

The United States led all exporters to Canada, with shipments in June worth \$23,994,850, an advance of 31 per cent. over the \$23,911,997 worth shipped in June a year before. The United Kingdom, largest supplier among empire countries, boosted its sales in Canada from \$9,954,185 in June, 1935, to \$11,063,861, up 11 per cent.

Returning property was believed responsible for part of the gain while the United States appeared to have benefited materially from the reciprocal trade agreement, not effective last summer.

Canada's imports from British empire countries during June were worth \$17,432,115, an increase of nine per cent. or \$1,326,630 over the same month in 1935, while imports from foreign countries amounted to \$40,166,017, an increase of more than 31 per cent. compared with \$30,626,204.

Canada's total imports in June were worth \$57,598,132, an advance of more than 23 per cent. against \$46,731,689 in June, 1935.

Ontario's Wheat Crop

May Be Larger Than Last Year Is Prediction

Toronto.—Despite drought conditions, Ontario's wheat crop will likely be by more than 2,500,000 bushels larger than the 8,000,000 crop of 1935, C. H. Carlisle, president of the Canadian Bread Company, told shareholders at annual meeting here.

The current Canadian crop, he said, would probably total 250,000,000 bushels.

With the 125,000,000 bushels carried over from last this would make the amount of wheat available equal or greater than the average Canadian crop of 350,000,000 bushels.

Wine For Working People

Soviet Government Orders That Champagne Production Be Increased

Moscow.—Wine for working people, the Soviet government has decreed.

The newest official edict ordered champagne production increased from 300,000 bottles this year to 12,000,000 in 1942.

Comment.—The leaders declared the order was one of a series which point toward greater freedom and a more abundant life for the Russian proletariat. Champagne, they said, will no longer be considered a luxury in the Soviet.

English Papers Penalized

Fined Heavily For Publishing Capions About King Edward

London.—Two newspapers and a news reel company were fined a total of £1,050 (about \$5,250) and about £1,000 in costs for publishing captions on July 16 worded: "An attempt on the King's life" or "The King: assassination attempt."

The town council has decided to
bolster up the reservoir so as to in-
crease the water storage capacity.
The work commenced yesterday.

Word from Beaver Mines states
that the condition of Jack Giola, who
suffered a paralytic stroke several
weeks ago, is unchanged.

The people who drive the fastest
usually have the least to do after
they get wherever they're going—if
they get there, remarks an exchange.
And in most cases this is true. Think
it over.
